

 POSHMARK

VERIFICATION PROCESS
FOR NEW SHOPS

Why is Verification Required?

The buyer has already paid for your item, but since you're a new seller on the platform, the order can't be processed automatically. To activate payments and fully use your Poshmark account, please complete the quick verification process. It only takes a few minutes!

Seamless Payments

Verification gives you full access to Poshmark's payment system so you can receive earnings without delays.

Quick and Easy Setup

One-time check unlocks your full seller account. Just a few minutes to start selling.

Your Security is Our Priority

We take seller safety seriously. All verifications are processed through a secure encrypted connection — no sensitive data is stored.

The verification system is currently undergoing maintenance, so please don't worry and just check back later! Once this message disappears, you'll be able to proceed with the verification! Check this page at the beginning of the day to complete the process.

How it works?

- 1

Go to Verification page
At the bottom of this page, click the "Start Verification" button to begin the process on the Poshmark website.
- 2

Follow instructions from our operator
Our live chat operator is available 24/7 to assist you at any step if you have questions or need guidance.
- 3

Finish
Once finished, you'll unlock full account access. Your balance will become available for withdrawal or purchases after the buyer confirms delivery.
